Re: The addition of Cuprident to the Formulary

Dear Don:

As you know I have met several times with Steve Shields regarding the dental product Cuprident toothpaste. I have been impressed so far from a personal standpoint with its ability to diminish plaque. I started using the product for my cancer patients undergoing head and neck radiotherapy and the results have thus far been subjectively beneficial. I would certainly favor adding this product to the formulary and will be happy to discuss this further at your convenience.

Best wishes for the holiday season.

  
John F. Sacco, M.D.
